Portraiture in the natural surroundings of your home and outdoors is encouraged. Be creative; scenic locations and proper clothing selection will result in outstanding quality portraits. I'm available to meet with you to pre-plan a portrait location and look at clothing selections.

What are the Best Ages for Children's Portraits

6 months: When the baby is alert and responsive... cuddly, warm, completely dependent, yet old enough to be posed.

1 year: When permanent feature characteristics first begin to show future family likeness... a baby still, but a robust and growing person.

2 years : When the language barrier has been broken and the child responds to reason... humor and action.

4 years: When the child begins to display individuality and a new permanent element of personality.

7 years: When second teeth change the facial contours and a growing mind develops a more mature, inquiring outlook.

12 years: When the child first approaches the teens to enter a dress rehearsal for adulthood, taking first steps to independence.

16 years: When childhood ends and the mature adult is emerging.

18 years: High school senior portraits.
